

Modeling Kitchen Fire Safety

These simple fire safe behaviors in the kitchen prevent injury!

Keep cooktop clear

Move anything flammable away from the stove or cooktop.

Have a pan lid nearby

If sautéing or frying, have a pan lid nearby to extinguish a fire. Never put water on a grease fire.

Don't reach over hot pans & burners

Have all your cooking materials, including recipes and dry oven mitts in place to avoid reaching over a hot pan or burner.

Turn pot handles away

Remember to turn pot and pan handles in and toward the side or back of the cooktop.
