A dynamic, interactive, proven successful injury prevention program designed with the specific needs of older adults in mind. Stay Safe at Home is offered in two formats:

**Group Seminar:** Raise awareness of home safety risks for older adults and problem solve in a fun, interactive and engaging seminar. Topics covered include fire safety, falls prevention, emergency preparedness and common and uncommon household hazards.

**In-Home Safety Assessment:** Completely customized for each individual and conducted in-home by experienced professional trainers. Recommendations to reduce home hazards will be made with the option of additional individualized training sessions.
